

## THE WORLD OVER

VICTORIA LUMBER, ROYAL YACHT

GLACIAL STREAM FLOOD, ALASKA

ITALIAN TROOPS MARCH INTO ETHIOPIA WEDNESDAY

**VICTORIA**—Two huge spars of Douglas fir, one 108 feet and the other 95 feet, dressed, are being shipped this week from Cowichan Lake to Great Britain, where they are destined for His Majesty's yacht Britannia. The great spars were selected from Vancouver Island timber after careful tests.

**SEWARD, Alaska**—Reporting that glacial stream floods have done several thousand dollars damage to the line, Col. G.P. Cohen the governor of Alaska railroad general manager, on Thursday last recommended the War Department drive a diversion tunnel to save the road.

Flood waters cut off the northern end of the city when the Lowell Creek came jammed with earth, rocks and debris. The water backed up half a mile, washing out several bridges. The city still was without power last Friday when the flood reached the electric plant.

Italian troops commenced their advance on Rhigotto last Wednesday, when in Rome Benito Mussolini, with clenched fists sternly pledged a mobilized Fascist nation to meet "war with war", should the League of Nations impose military sanctions upon Italy.

Meanwhile in Addis Ababa nearly 25,000 Ethiopian warriors were on the march, some towards the Italian Colonial frontier in anticipation of a general mobilization.

**Germany Will Not Join Italy**  
Premier Laval of France was reported to have received assurance from Adolf Hitler, German Chancellor, that

When a man has a birthday he takes a day off. When a woman has one she takes a year off.

GOVERNMENT TO CONSTRUCT  
NEW MENTAL BUILDING

Construction of a \$25,000 addition to the Oliver Mental Institution to provide increased dormitory accommodation will be commenced immediately, according to Premier Acheson. At the same time he announced that the government plans to renovate the Raymond Agricultural school for the same purpose, would be abandoned.

"We have concluded that building this addition would be more economical and cause less overhead than the renovation of the Raymond school," he said.

The Reich has no intention of joining Italy.

**Actual Fighting on Thursday Last**  
**ASMARARA, ETHIOPIA**—An engagement between 50,000 Ethiopian warriors and the vanguard of Italy's advancing army took place on the northern wasteland region 12 miles from Asmara, according to native sources but the outcome was not divulged.

Italian regular infantry, Fascist militia and Ethiopian native troops crossed the Marsh River after two air bombing squadrons had bombarded some Ethiopian trenches opposing their advance.

The Italian advance was over caravans trails, indicated only by markers and sometimes trackless entirely, requiring native guides who marched with the advance columns. Their progress is a succession of steep inclines and down slopes, descent was a gradual rise in elevation of 3000 feet, was unimpeded until a point within 12 miles of Asmara. It was said.

The Headquarters Command said Ethiopian advance guard trenches were attacked from the air as a prelude to the infantry drive.

## Who Will Be Prime Minister?

HON. R. B. BENNETT  
Conservative Leader

HON. W. L. MACKENZIE KING  
Liberal Leader

HON. H. H. STEVENS  
Reconstructionist Leader

TAXATION ADDS \$50 PER YEAR TO  
OPERATING COST OF CAR

"What does it cost to operate an automobile?" This question has been asked for centuries by motor vehicle owners since cars were introduced and the calculations have been made on a variety of bases.

Usually, however, owners figure only on operating costs such as gasoline oil, repairs, tires, garage rent, depreciation, but fail to take into account the effect of taxes on the total operating costs.

Figures taken from official records show that motorists paid out the following amounts in Canada in 1934: \$29,654,562 in gas tax, \$14,547,430 in excise taxes, \$323,065 in sales tax, \$21,849 in customs tax, while auto tax, computed at six per cent on the total value of all cars sold in that year amounted to \$4,547,127. The grand total, therefore, was \$52,769,584 or within a few cents of \$50 per car.

Such membership, insurance and other miscellaneous costs also figure in the total and all these extra costs would be added to the actual operating costs to obtain a correct figure. Estimates in the United States based on state gasoline tax, federal gas and oil taxes, license fees and federal automobile taxes exclusive of those on gas and oil and also property taxes show an increase of from \$27 per motor vehicle in the district of Columbia to \$72.25 in Florida.

THINGS THAT COUNT

Not what we have, but what we use. Not what we want, but what we choose. These are the things that men or boys. The sum of human happiness.

The things nearby, not things afar. Not what we seem, but what we are. These are the things that make or break.

That give the heart its joy or ache. Not what seems fair, but what is true. Not what we dream, but what we do. These are the things that define the gems.

Like stars, in fortune's diadems. Not what we take, but what we give. Not as we pray, but as we live. These are the things that make for peace.

Both now and after time shall cease.—Selected

RECALL SYSTEM TO BE  
IMPLEMENTED, SAYS PREMIER

As the recall system is part of the Social Credit League platform upon which the party went into power in the provincial election on August 25, it will be implemented, Premier William Acheson declared on Thursday. The recall drive up a number of the legislature by its constituency association and makes him subject to removal on request of his organization. This form of discipline is called upon by parties to maintain discipline and loyalty to party principles and in this territory, however, it is felt, it will enable Premier Acheson to keep a close check up on the actions of his supporters.

WHO WILL BE PRIME MINISTER?

Canada's general election takes place after Oct. 14, and voters are at a crossroads as to what they are voting for, and whom they should support.

It appears that in federal politics it is not the man, but the party that is at all times, and for this reason we believe that the voter should first decide to cast his ballot in favor of the party which he believes offers the best constructive policy of government for Canada at this time, and who will be able to carry out his program.

In the second place, if you are a good judge of who will be the next prime minister, most certainly vote to have a government member elected. If you are not so sure, study the party programs and try to judge for yourself, with the interests of Canada at heart.

It now appears that the next Prime Minister of Canada will be either Mr. Bennett or Mr. King. Stevens does not seem to be in the running—neither does Mr. Woodsworth although both of the latter leaders have many supporters in Canada.

Make your choice between Bennett and King—and in this constituency: from between Andy Davidson and C.R. Walrod. These two candidates are best respected men and at present are the movers of Calgary and Banff respectively.

SOCIAL CREDIT RANKS  
DIVIDED IN EDMONTON

Splitting Social Credit ranks in East Edmonton were open, Dr. Raymond C. Gibeault announced last week when standing as Social Credit candidate in the federal election opposing Dr. W.S. Hall who received the Social Credit nomination at a recent convention. Meanwhile it was declared that J.A. Bell, former of Calgary and candidate in West Edmonton would be replaced by either Patterson or Clayton Adams.

MARKING THE FEDERAL BALLOT

The method used by some of the many who spoiled their provincial ballots on August 22, should be adhered to in the federal ballot, October 14, when the use of a cross (X) is the correct procedure.

Placing an (X) behind the name of the candidate is one's choice as a single procedure—in fact the standard form of marking a ballot, yet, with confusion in the minds of some, since using the preferential and transference systems as were applied in the federal election of 1930, there will likely be a number of spoiled ballots when the federal count is made.

In the 1930 federal contest, there were 24,119 spoiled ballots, and in many of the municipalities which will be at issue from now on, it is almost a safe bet that the number will not be much less during the 1935 contest. It should be kept in mind by those who refuse to vote in the polling booth, that they have spoiled their ballot by having someone else place their mark, or having placed a wrong mark, application for a new ballot paper should be made immediately in the returning officer's office.

Remember to mark X on your federal ballot—Exchange.

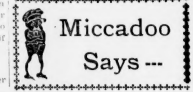

THRESHING ALMOST COMPLETED  
IN CARBON AREA

Thrashing operations in this district are almost complete, with most of the farmers having finished on all their wheat and oats. There remains the odd acre to be harvested, but this is the exception.

While yields were not as good as expected in some parts, farmers to the south report that they harvested on an average from 25 to 30 bushels to the acre. To the north, east and west some reports of lower yields with that average from 20 to 25 bushels to the acre, although the grades in a few cases were as low as No. 2, while the best crops were grading nearly No. 1.

An ideal fall was experienced for harvesting and conditions were only held on for a few more days. Apart from this there has been no delay and as a result much wheat has been hauled to the elevators, the C.N.R. line to the west which has come in so fast and cars have been very scarce, resulting in the elevators being "piled up" for more than a week. In the town of Three Hills, where there are eight elevators, farmers were forced to discontinue hauling their grain on account of lack of storage space in the grain bins. Swallow reported the same condition.

The seed crop and price has made a better feeling amongst our people and business in general has made a sharp upturn.

**Miccadoo Says**

Sometimes when opportunity knocks at a man's door, he doesn't hear it because he is doing too much thinking himself.

Why do you call this an enthusiastic story?  
"Nice—because the cook put everything he had into it."

## Controlling The Rust Menace

Very little reflection is required to demonstrate that an expenditure of ten years' intensive work by trained scientists at \$600,000 a year of real estate is a low price to pay for insurance of Western Canada's future wheat crops against the appalling loss which a few days of rust infestation can levy against the farmers of the West.

The \$600,000 referred to and the ten years spent in work in the laboratory and the field, it was recently announced, is the cost to the nation to date of producing an unnamed wheat which, according to authorities, is able to withstand a rust epidemic unscathed and at the same time produce a kernel with all the desirable attributes of the best commercial varieties of bread wheat.

Compled with this announcement was the further statement that this new wheat can be multiplied to a sufficient extent at Dominion government experimental farms and on private lands under government supervision to enable a general distribution of seed to be made to the farmers of the west in 1937.

These announcements were accompanied by a further declaration of considerable importance, namely, that the government intends to retain control of the source of supply of this valuable seed and to see to it that the farmers are not exploited by private concerns in connection with its distribution.

The statement means that the farmers of Western Canada will be able to secure in two years time a substantial supply of seed wheat that is guaranteed to enable them to grow a crop completely immune from ravages by rust, and at a reasonable price probably at cost.

It is perhaps a coincidence that these announcements were made at a time when Western Canadian wheat crops were hit by the worst infection of rust that the west has known in history but the information should put new heart into the many thousands of farmers who this season have their hopes of recovery blighted when millions of rust spores descended on the most promising crop in years and slaughtered yield and grade which meant reducing price to the vanishing point.

The news given in these important announcements may well mean that 1937 will be the last time that Western Canadian farmers have to suffer tremendous loss from rust infection. This statement is made with caution, however, for although it is not usual for rust infestation to follow in successive years, it cannot be stated affirmatively that it will not occur again before sufficient of the new wheat is grown to make a reputation of the 1935 calamity and responsibility.

Results of the work that has been done during the ten years' quest for a rust resistant wheat and laboratory and field trials of the strains which have been produced, however, appear to indicate that the battle against rust has been won by the scientist and agronomist.

There is additional comfort for the farmer, however, in another conclusion, namely, that it is one of the five strains of rust resistant wheat which are being increased this year and shows a tendency to resist other diseases, those mentioned specifically being stinking smut, leaf rust and one of the varieties as reported as "moderately resistant" to loam smut.

So that it is possible that while the experts have won their fight against rust they have at the same time scored at least partial victory in the battle against some of the other diseases to which wheat is heir. To what extent these other disease pests have been overcome while the major conflict was being waged time and experiment alone will prove. It is safe to say, however, that these important advantages will be followed up with the same vigor that these scientists have shown in their now successful efforts to overcome the major enemy.

Definite proof that the new wheat is all that is claimed for it exists as a result of field trials and laboratory tests which have been made during the ten years the work has been in progress and particularly this season.

In field plots the new wheat showed up clean and bright while alongside it the other standard varieties of commercial wheat were sick with the disease. Laboratory and commercial tests have also shown conclusively that the new wheat has milling and baking qualities equal to that of Marquis and Howard.

The tests have demonstrated equally conclusively that the new wheat has the requisite length and strength of straw, yield, earliness, appearance of kernel and weight per bushel possessed by the best of the present day commercial varieties.

In other words the new wheat fills all the requirements of the type of hard spring wheat which has made Western Canada famous in the world's bread markets and has the additional ability to withstand rust, and perhaps to withstand some of the other diseases which periodically take toll of the Western grain farmer.

### Radio Clock Patented

Radio clock which requires no wiring has been patented at Quebec known as a "radio clock," which can be operated from a distance of 500 miles, it has no works a small receiving set to guide the progress of the hands. The exact time is recorded on the basis of astronomical data.

### New Name Sought

Scores of letters have been received by J. R. Macdonald, Stipendiary Magistrate of Hull, England, offering alternatives to the word "dole," for which he offered a prize of \$250. So far not one suggestion is regarded as good enough for the award. One writer sent a list of 65 alternatives.

The reversible snake-lizard travel backwards or forwards equally well.

Ninety per cent. of the world's nickel supply is produced by Canada.

## Empress Of Ethiopia

Claims She Is Descendant Of Queen Of Sheba

Through all the worries and anxieties brought upon him by Italy's threatened conquest of Ethiopia, Empress Haile Selassie's most devoted companion and counsellor has been his wife, Empress Walseru Mennen. Gifted with uncommon intelligence, astuteness and foresight, the 41-year-old Empress urged the Emperor not to yield to Mussolini's threats but to defend the kingdom to the last.

Emperor Haile Selassie is Walseru's fourth husband. Maybe that is why she is called the "Queen of Kings." They have three sons and three daughters. They have been married 23 years, and it is said they have never had a quarrel. The Emperor like most of the higher-caste Ethiopians, is monogamous. Walseru is his only wife.

"Walseru" means literally "Lady of Quality." She is the daughter of a famous provincial prince, and has a very dignified and aristocratic bearing. She was educated by private tutors. The "Queen of Kings," who is not yet 40, and 40 claims to come from the same Hamitic stock as the famous Queen of Sheba who ruled Ethiopia 3,000 years ago. She also claims descent from the famous Cleopatra. She is addressed by her ten million native subjects as "Your Serene and All-Just Majesty." She signs herself "The Conquering Lion of Judah hath conquered."

The Empress speaks no language except the ancient Amharic, which is of Semitic origin. All attendants who approach her shield their mouths with their white shawls (shawls).

## Dionne Quintuplet: Bowl

Smartly Designed Bowl Is Offered As A Gift

A surprise gift which will interest every parent, every child and, in fact, every housewife, is the creation of the world-famous Dionne Quintuplets, has been announced. The article referred to is a smartly designed bowl of the five little sisters and brother, the Dionne Quintuplets, to Birthday Bowl. Made of shining lifetime chromium, it is 8 1/2 inches in diameter, 2 1/2 inches in height, and is rimmed and embossed inside with a charming sculpture of the "Quintuplets." The rim is engraved the names of babies—Elna, Annette, Marie, Yvonne, and Cecile. Ready to be an ideal cereal bowl for a child, it makes a distinctive dish and every dish or bon-bon dish.

## Heaviest Air Passenger

United Air Lines Carried Judge Who Weighed 400 Pounds

When County Judge A. W. Dulworth applied for a ticket at the United Air Lines office at Omaha the booking clerk was in a quandary. The judge weighs four hundred pounds and is probably the heaviest in the world. The clerk did not wish to offend him, but at the same time considered if he could book him on board an aeroplane on only one ticket. The company were pleased to take him without extra charge. However, as the judge was undoubtedly the biggest passenger they had ever carried, and they wished to mark the occasion.

## A Strange City

Queer Place In Derbyshire, England Has Only Eight Houses

A strange city may be found in England within two miles of Chester—the quaint and smallest city in the world. It has only eight houses and 25 inhabitants. It is the city of nothing, for there is no church, no chapel, no public house, no shop, no post office. No electricity or gas is found there—they use oil lamps. How or why it became a city nobody knows, but it is believed to have been founded on the ashes of a Roman camp.

The vast unexplored continent at the South Pole, Antarctica, is believed to be about the size of the United States and Mexico combined. Geographers are not certain that it is one large continent; it may be made up of islands.

The possibility of travelling to the moon, by means of a "flying chariot" was discussed by a scientific-minded bishop in England in the seventeenth century.

The temperature of one of the sun's spots is about 4,700 degrees centigrade. This is about 1,600 degrees cooler than the sun's spot surface.

## New Type Flying Boat

Soviet Aviation Authorities Try Out Parachute Kite

A passenger and freight-carrying "parachute kite," which Soviet aviation authorities said they believed would be able to ascend into the stratosphere, had its first successful trial lifting four tons of cargo.

An ordinary freight "parachute," with a dome 65 feet in diameter, was used. The load was attached with short ropes leading from one side of the parachute. The other side bulged upward, giving the lifting power. Longer ropes, running from the bulging side, also were attached to a load which, for passenger-carrying purposes, would consist of a gondola. By manoeuvring the longer rope, the crew, experts said, could steer the parachute and control its ascent and descent.

The whole combination load was called a "parachute train" in the official description by Prof. I. Grolodsky of the experimental research institute of the Commissariat of Heavy Industry which is sponsoring the trials. Grolodsky said he believed the parachute could carry explorers into the stratosphere and described flying in a parachute kite as the safest mode of air transport and a safe descent.

## Exporters Must Be Careful

Warned Against Sending Goods To Italy Without Guaranteed Payment

The Department of Trade and Commerce said it had received a cable from the Canadian Trade Commissioner at Milan warning Canadian exporters of goods to Italy, that they must take careful steps to ensure payment.

The cable, sent by A. B. Muddi, urged careful dealing with Italian importers because of exchange restrictions by the Italian government. "No shipment of goods should be made from Canada to Italy unless the Italian importer has given assurance he has obtained an import permit from Italian authorities allowing the importation," it said.

## Only Four Feet Wide

Philadelphia Is To Have Narrowest Building In U.S.

A building being erected at Philadelphia, Pennsylvania, will, it is believed, be the narrowest in the United States. It will be only four feet wide.

The site of the building is all that is left of a corner plot from which the city sliced most of the ground in order to widen a street. The new building will be constructed of stainless steel, and half of it will contain a restaurant which will have a front which can be removed in summer.

## Liner Gateway Blocked

Passengers At Southampton Held Up

Thousands of bees held up passengers about to embark on the liner Moldavia at Southampton, England. The bees settled down comfortably at the foot of the passenger gangway and defied attempts to move them. A hose was tried, but this merely irritated the bees, and caused them to buzz in clouds, scattering onlookers. Eventually order was restored, and embarkation proceeded.

## Transmits Sound And Vision

Television In Germany Covers Distance Of Nearly 30 Miles

A great advance in television service has been achieved by a transmission from Witten in Germany, a distance of nearly 30 miles. The transmission, both for sound and vision, is stated to have been very good. Dr. M. Hahnemann, head of the German broadcasting service, was seen and heard by the men of the labor camp at Glenside, whom he addressed. Afterwards, news reports were transmitted with results reported to be equally satisfactory.

The catfish gets its name from the cat-like whiskers and pouring note it makes when caught.

How the faithful slave girl saved her master's life—how the robber was foiled through a great eastern custom regarding Salt—is told in picture and story in new book for Children! Yours free!

TOWN & COUNTRY  
Personalographs

Mr. T. J. Demsey and daughter, both left last Thursday for Calgary.

Mrs. Ritchie was the lucky winner in the Baco Baking Powder draw last Saturday at the Farmers' Exchange where Mrs. Van Camp was demonstrating. She received a delicious fruit cake.

A shower for Miss Gladys Craddock, bride-elect, was held at her home on Tuesday afternoon last. Miss Craddock received many useful gifts.

Mrs. W. Poxon spent Thursday and Friday of last week in Calgary.

Patric Kilien of Rockyford was a visitor to Carbon last Thursday, transacting business in town.

Two political meetings of interest were held in Carbon recently. On Sunday E. J. Garland, C.C.F. candidate

for the riding and present member, held a fine meeting in the Farmers' Exchange hall. Mr. Garland is a good speaker and has many supporters in the district. On Tuesday night Mayor Andy Davidson held a well represented meeting in the hall and asked the support of the electors on a Conservative ticket.

Read in any news items you may know of to The Chronicle. We appreciate this courtesy and are always glad to act the news.

Mayor Walrod of Rockyford, Liberal candidate, was a Carbon visitor last week. W.E. Clemons accompanied him on his visit to this part of the riding.

When making out your fall accounts you will require statement and account forms, as well as envelopes. Get them at The Chronicle office and support home industry.

Const. Strevens is back on duty after a few days leave of absence on account of injuries received from a glass cut while attempting to quell the flames when his car was recently destroyed by fire.

The leaves have all disappeared off the trees and fall is here with its old time Indian Summer. Cool winds are now working in the valley and preparations are being made for a steady rain.

"Who save the bride away?" The newspapers had a lot to do with it. They told about the mysterious deaths of her first three husbands.

Asked to pray for warm weather, so the late grandmother's rhyming might run away, a six-year-old girl

## FOUR MISTAKES . . .

A man struck a match to see if the gasoline tank in his automobile was empty. It wasn't.

A man patted a strange bull dog on the head to see if it was affectionate. It wasn't.

A man speeded up his car to see if he could beat the train to the crossing. He couldn't.

A man cut out his advertising to see if he could save money. He didn't.

I have recently taken over the JOHN DEERE AGENCY and solicit your business. Full line of repairs carried in stock at all times.

inlet and said: "Oh, Lord, please make it hot for grandma."

"I don't Donald's broken out again."

"How dare ye think that, Billy?"

"Last night he was lecturing the crowd at the cross on the evils of strong drink."

"Am pleased to hear of that; it's a good sign."

"Aye, but ye see there was no crowd."

In the long run it does not pay to make, or buy, or sell trash.

## A.M.A. AIDS IN SECURING FUNDS TO FINISH HIGHWAY

Securing of better highways has long been one of the main objectives of the Alberta Motor Association. This organization has frequently emphasized the need upon governments and, at times, with successful results.

Only recently the Edmonton branch of the A.M.A., acting in co-operation with the Chamber of Commerce, urged Premier Aberhart while at Ottawa to obtain a federal loan that would ensure completion of the Jasper highway.

Backed with this support, the premier laid his case before the federal authorities, resulting in a loan of \$2,250,000 being arranged to meet the province's general financial requirements until the end of next October. Of particular interest to motorists, however, especially those who are members of the A.M.A., was the premier's direct assurance to the two Edmonton organizations that satisfactory financial arrangements had been made

at Ottawa and work on the Jasper highway would proceed.

While the announcement has been met with a great deal of gratification, it is believed that through the highway and other proposed improvement efforts of the A.M.A. many a moment.
